

# VENTCROFT LTD

Manufacturing Global Life Safety

## Environmental Policy

Ventcroft Limited are a leading Manufacture and Supply of Fire Performance Cables. We recognise that our activities can potentially affect the environment and, as part of our overall commitment to excellence, we are determined to operate in an environmentally responsible and sensitive manner.

We will seek to improve our environmental performance in line with other business developments and will seek as a minimum standard to comply with all applicable environmental legislation and related requirements. In implementing this policy we will:

- Endeavour to use energy and other natural resources efficiently at all times;
- Seek to minimise the quantity of waste that we produce and ensure that any waste that is produced is disposed of responsibly. For each waste stream we shall seek to use the most environmentally appropriate waste disposal options that are economically practicable;
- Ensure that any environmental issues on the sites where we work are fully understood and that all appropriate environmental precautions and controls on site are observed at all times;
- Prevent pollution from our activities through appropriate environmental controls
- Ensure that all staff and those working on behalf of the company are aware of the policy and of the relevant operational controls and procedures that relate to the tasks that they perform.

We will set ourselves specific objectives and targets in relation to these commitments and shall monitor our performance in implementing and achieving these objectives.

It is the responsibility of all company staff, as well as those partners working on behalf of the company to respect and implement this policy at all times and in aspects of their work.
